Cash and cash equivalents at end of the period	**8,475**	**5,398**

The above consolidated interim statement of cash flows should be read in conjunction with the accompanying notes.

Notes to the Consolidated Interim Financial Statements (unaudited)

1 BASIS OF PREPARATION

Reporting entity

These consolidated interim financial statements are for Metro Performance Glass Limited ('the Company') and its subsidiaries (together, 'the Group'). The Group supplies processed flat glass and related products and services primarily to the residential and commercial building sectors. The Company is a for-profit entity for financial reporting purposes and has operations and sales in New Zealand and Australia.

Statutory base

The Company is a limited liability company incorporated and domiciled in New Zealand. The address of its registered office is 5 Lady Fisher Place, East Tamaki, Auckland.

The incorporation date for Metro Performance Glass Limited was 30 May 2014 and as part of a group reorganisation was listed on the New Zealand Securities Exchange (NZSX) on 29 July 2014.

The comparative trading results presented encompass the six-month period from 1 April 2025 to 30 September 2025.

Basis of preparation

These consolidated interim financial statements have been approved for issue by the Board of Directors on 24 November 2026.

The Group's unaudited condensed consolidated interim financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice (NZ GAAP). They comply with the requirements of International Accounting Standard (IAS) 34 Interim Financial Reporting and with New Zealand Equivalent to International Accounting Standard (NZ IAS) 34 *Interim Financial Reporting*.

These consolidated interim financial statements are presented in New Zealand dollars and rounded to the nearest thousand. These condensed financial statements do not include all the information required for full financial statements, and consequently should be read in conjunction with the full financial statements of the Group for the year ended 31 March 2026. The same accounting policies, presentation and methods of computation have been followed in these condensed financial statements as were applied in the preparation of the Group's audited financial statements for the year ended 31 March 2026.

The Group's revenue and profitability follow a seasonal pattern with lower sales and net profits typically achieved in the second half of the financial year as a result of lower sales generated during the Christmas shutdown period.

Historical cost convention

The financial statements have been prepared under the historical cost convention, except for the revaluation of certain financial assets and financial liabilities at fair value.

Principles of consolidation

The consolidated interim financial statements incorporate the assets and liabilities of all subsidiaries of Metro Performance Glass Limited ('the company' or 'the parent entity') as at 30 September 2026 and the results of all subsidiaries for the period then ended.

Subsidiaries are all entities over which the Group has control. A subsidiary is a controlled entity of Metro Performance Glass if Metro Performance Glass is exposed and has a right to variable returns from the entity and is able to use its power over the entity to affect those returns. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provided evidence of the impairment of the asset transferred.

Notes to the Consolidated Interim Financial Statements (unaudited)

(continued)

Foreign currency translation

Functional and presentation currency

The consolidated financial statements are presented in New Zealand dollars which is the Company's functional and presentation currency and rounded where necessary to the nearest thousand dollars.

Transactions and balances

Foreign currency transactions are translated using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

The results and financial position of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each statement of profit or loss and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income.
- on consolidation, exchange differences arising from the translation of any net investment in foreign entities, and the borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

Goods and Services Tax (GST)

The consolidated interim statement of comprehensive income has been prepared so that all components are stated exclusive of GST. All items in the consolidated interim statement of financial position are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed in each accounting note as appropriate.

The critical accounting estimates and judgements at 30 September 2026 include:

- use of going concern basis of accounting (refer: going concern disclosure below)
- impairment assessment of goodwill and impairment assessment of Group assets (refer: 5 Intangible Assets)

Going concern

In preparing these financial statements, the Directors have considered the Group's ability to continue as a going concern. These considerations are outlined below:

The Group reported a net profit of $1.1m for the 6 months ended 30 September 2026 (2025:net profit of $2.9m); and a profit before significant items, interest and tax for the 6 months ended 30 September 2026 of $4.9m (2025: profit of $1.0m). As at 30 September 2026 the Group has positive working capital of $31.0m (30 September 2025: positive $29.2m). In the 6 months ended 30 September 2026 the Group has generated $6.7m in net cash from operating activities (2025: $5.8m).

Last year, the Group undertook an equity raise including a rights issue for existing shareholders and an issue of ordinary shares to Amari Metals Australia Pty Limited. These transactions settled on 19 September 2025 raising a total of $23.9m which was primarily used to repay debt. Debt was further reduced by a $10.0m debt accommodation from the banking syndicate.

At 30 September 2026 the Group's banking facility (which was renegotiated together with the equity raise last year) stands at $41.0m (30 September 2025: $41.0m) of which $24.9m has been drawn (30 September: 2025 $26.8m). The renegotiated facility expires on 19 September 2028 and the liability is therefore classified as non-current in the consolidated statement of financial position at 30 September 2026. The Group's financial covenants include interest cover and leverage ratios. The Group received covenant amendments and did not breach any covenants during the year. The Group is forecasting to meet covenants going forward.

The Directors remain focused on growing and improving both the Australian and New Zealand businesses and continue to engage in actions to improve the profitability of the Group. Market conditions in New Zealand and Australia remain subdued and this is expected to continue in the short to medium term however the Group's forecasts indicate that the Group will be able to comply with the conditions of the renegotiated banking facility.

Based on the Group's forecasts, financial position and relationship with lenders, the Directors concluded the Group's financial statements should be prepared on a going concern basis and that no material uncertainties exist.

Notes to the Consolidated Interim Financial Statements (unaudited)

(continued)

2 FINANCIAL PERFORMANCE

2.1 Segment information

Operating segments of the Group at 30 September 2026 have been determined based on financial information that is regularly reviewed by the Board in conjunction with the Managing Director and Chief Financial Officer, collectively the chief decision-maker for the purpose of allocating resources, assessing performance and making strategic decisions.

Substantially all of the Group's revenue is derived from the sale of glass and related products and services. This revenue is split by channel, only at the revenue level, into Commercial Glazing, Residential and Retrofit. Commercial glazing revenue reflects sales through two (2025: four) specific commercial glazing operations in New Zealand. Retrofit revenue reflects sales through two (2025: four) specific retrofit operations in New Zealand and the retrofit channel sales from all (Metro Direct) branches across New Zealand. Residential revenue reflects all other sales channels. The allocation of sales between residential and commercial can be difficult as the Group does not always know the end-use application. Following the acquisition of Australian Glass Group Pty Ltd (AGG) on 1 September 2016 the Group operates in two geographic segments: New Zealand and Australia.

In the tables below: Group costs consist of insurance, professional services, Directors' fees and expenses, listing fees and share incentive scheme costs.

	SEP-26			
	New Zealand $'000	Australia $'000	Eliminations and other $'000	Group $'000
Commercial Glazing	12,044	–	–	12,044

2.2 Significant items

	CONSOLIDATED	CONSOLIDATED
	Sep-26 $'000	Sep-25 $'000
Net extinguishment of debt	–	(9,222)
Restructure of the NZ and Australia operations	–	608
Refinancing, capital raise and takeover related expenses	–	32
Total significant items before taxation	**–**	**(8,582)**
Tax benefit on above items	–	2,396
Total significant items after taxation	**–**	**(6,186)**

Accounting policy

Significant items are a non-GAAP measure and are based on the Group's internal policy as follows. Transactions considered for classification as significant items are material restructuring costs, acquisition and disposal costs, impairment or reversal of impairment of assets, business integration, and transactions or events outside of the Group's ongoing operations that have a significant impact on reported profit.

Net extinguishment of debt

The capital raise last year resulted in the bank syndicate providing an accommodation of $10 million reduction in the debt and facility levels, netted off against any fees or costs incurred in relation to the renegotiation of the debt facility.

Restructure of the NZ and Australia operations

The Group continued its cost out programme last year, furthering the comprehensive review of its organisational structure and manufacturing footprint by the project team to identify and target efficiencies. This resulted in staff restructuring costs through FY2025 and FY2026 in both Australia and NZ operations as well as the closure of the Wellington manufacturing facility in FY2025. The costs of this programme are included in the 'Restructure of NZ and Australia operations' significant items. The nature of the costs incurred include redundancy payments, loss on disposal of inventory and some assets, and costs incurred transporting and re-commissioning assets in other plants within the Group.

Refinancing, capital raise and takeover related expenses

On 6 May 2024 the Group announced that it will progress a capital raise to further reduce its debt level, which occurred in September 2025. The capital raise costs include legal and professional fees incurred in the exploration of this activity. During the 2025 financial year, the Group also received a non-binding proposal from CCP VI Bidco (NZ) Ltd which did not progress. Takeover related expenses relate to professional and legal expenses incurred related to these activities.

3 PROPERTY, PLANT AND EQUIPMENT

During the six months ended 30 September 2026, the Group acquired assets with a total cost of $1.6 million (September 2025: $1.6 million) and disposed of assets with a total book value of $0.8 million (September 2025: $0.08 million). There have been no material changes in the estimated useful life of key items of plant and machinery. The depreciation expense for the six months ended 30 September 2026 was $4.1 million (September 2025: $4.1 million).

4 FINANCIAL INSTRUMENTS

Interest rate swaps and forward exchange contracts

These financial instruments were measured at fair value based on valuations provided by Westpac Banking Corporation. All significant inputs were based on observable market data and accordingly have been categorised as level 2. At balance date, the fair value of forward exchange contracts and interest rate swaps are $0.1 million asset (March 2026: $0.2 million asset).

The movements in fair value are disclosed in cash flow hedges (net of tax) through other comprehensive income, with a gain recognised on forward exchange contracts of $0.1 million (30 September 2025: $0.1 million gain), loss on interest rate swaps $0.1 million (30 September 2025: nil), and a gain of $0.4 million on the net investment hedge (30 September 2025: $0.5 million gain).

Notes to the Consolidated Interim Financial Statements (unaudited)

(continued)

5 INTANGIBLE ASSETS

The Group's segments have been classified as New Zealand and Australia aligning with the way the business is reviewed. The Australian goodwill arose in August 2016 with the acquisition of AGG. Goodwill balances are as follows:

	CONSOLIDATED	CONSOLIDATED
	Sep-26 $'000	(Audited) Mar-26 $'000
Australia	26,833	26,024

To ensure that the intangible assets are not carried at above their recoverable amounts, impairment testing for both CGUs is completed at least annually for goodwill with indefinite lives, and where there is an indication that the assets may be impaired.

Impairment tests are performed by assessing the recoverable amount of each individual asset or CGU. The recoverable amount is determined as the higher amount calculated under a value-in-use (VIU) or a fair value less costs of disposal (FVLCD) calculation. Both methods utilise pre-tax cash flow projections based on financial projections approved by the directors. The impairment tests of the Australian cash-generating-unit (CGU) and New Zealand CGU were performed at 31 March 2026 as part of the annual tests. Goodwill and intangible assets were reviewed at 30 September 2026, with no new indicators of impairment noted and no changes made to the estimated recoverable amount of goodwill.

6 INTEREST-BEARING LIABILITIES

	SEP-26	MAR-26	SEP-25
	$'000	$'000	$'000
Bank borrowings - non-current	33,344	33,222	32,157
Less: cash and cash equivalents	(8,475)	(8,266)	(5,398)
Net bank debt	**24,869**	**24,956**	**26,759**
Other financing - non-current	1,083	2,019	1,370
Net debt	**25,952**	**26,975**	**28,129**

7 RELATED-PARTY TRANSACTIONS

Amari Metals Australia Pty Limited

AGG is licencing warehouse space from Metal Centre (Australia) Pty Limited and Metro in New Zealand purchases aluminium from McKechnie Aluminium Solutions Limited which are wholly owned by a sister company to Metro's majority shareholder. These transactions are not material.

8 EVENTS AFTER BALANCE DATE

On 16 November 2026, the Group received a Notice of Takeover, from Amari Metals Australia Pty Limited, indicating it's intention to make a full takeover offer of Metro Performance Glass. The Group is still in the process of assessing whether there is any potential impact on any of the Group's contractual arrangements..
