Ventia secures Australian Marine Complex Common User Facility contract extension

Ventia Services Group Limited (ASX: VNT) has secured a five-year extension to manage and operate the Australian Marine Complex-Common User Facility (AMC-CUF) in Henderson, Western Australia, valued at approximately \$133 million. The extension will commence in July 2027, following the current term.

Ventia has operated the AMC-CUF on behalf of the Western Australian State Government since mid-2022. The facility is developing into a key national hub for shipbuilding and maritime sustainment, supporting both large scale industry and Australia's sovereign Defence capability.

This contract extension reinforces Ventia's role in managing critical common-use infrastructure and positions Ventia to support both the Western Australian Government's strategic infrastructure priorities and the Commonwealth's long-term Defence objectives at Henderson, including future growth opportunities aligned to the precinct's development.

Managing Director and Group Chief Executive Officer Dean Banks said, "Securing this extension reflects the strength of our performance at AMC-CUF. Henderson is a critical hub for Australia's maritime capability, and we are well positioned to support its next phase and to capture future opportunities as they develop. Our focus is on delivering safe, reliable and efficient operations while working closely with Government, Defence and industry to support long-term capability outcomes."

This announcement has been authorised for release by the Ventia Disclosure Committee.
