ABOUT TĀIKO CRITICAL MINERALS

Tāiko is a New Zealand incorporated company preparing to extract, refine and export critical minerals from privately owned farmland on the West Coast of the South Island of New Zealand, near Greymouth. The Company has strong mana whenua support, with resource consents through to implementation.

Tāiko plans to develop and produce ilmenite, zircon, garnet, and other critical minerals. The company's "mine to market" strategy involves refining these critical minerals at a planned Mineral Separation Plant on the West Coast and exporting them to global customers. The Company's operations are in start-up phase and are therefore pre-revenue.

BARRYTOWN CRITICAL MINERALS PROJECT

The Company's core asset is the Barrytown Critical Minerals Project, contained on Mining Permit ML 60785 covering 1250ha of coastal heavy mineral sands located ~30 km north of Greymouth.

Tāiko has been granted resource consents to mine the mineral resource from the Coates South Block property near Greymouth.

The Company has entered into a conditional Sale and Purchase Agreement with Barrytown Farms Limited to acquire approximately 304 hectares of farmland on the Barrytown Flats, securing access rights for the core mining blocks of the project.

The Company has also been granted resource consents to construct and operate a mineral separation plant at nearby Rapahoe, which will produce high value critical minerals from the mineral resource.

In addition, Tāiko will transport refined minerals via established rail infrastructure to South Island ports for export to global customers.

MINERAL RESOURCE

Tāiko has reported a JORC Code (2012) compliant Mineral Resource for the Barrytown Critical Minerals Project comprising Total Measured, Indicated and Inferred Resources of 25.3 Mt @ 24.1% VHM and 33.2% THM.

The Company has also reported an initial JORC Code (2012) Mineral Resource Estimate (MRE) for the Canoe Creek Block, with Measured & Indicated Resources of 2.85 Mt @ 20% Valuable Heavy Mineral (VHM).

PROJECT DEVELOPMENT

The Company lodged its substantive application for resource consent under the Fast Track Approvals Act 2024 on 8 June 2026. The application covers mining of the mineral resource extension of the Coates South Block contained in the Canoe Creek, Barrytown Farms and Cargill South Blocks.

Tāiko has received strong support from Mana Whenua Te Rūnanga o Ngāti Waewae, whose vital input is helping to shape the project from resource consents through to implementation.

COMPETENT PERSONS STATEMENT

The Mineral Resource information in this announcement is based on information compiled under the supervision of Mathijs van de Ven (MAusIMM) and Michael Gazley (MAusIMM, MAIG) of RSC, who are Competent Persons as defined in the JORC Code (2012). Both have sufficient experience relevant to this style of mineralisation and consent to the inclusion of this information in the form and context in which it appears.
