| Date of release through MAP | 13/05/2025 | |

1. Continuous issuers should indicate that this is based on the number of units on issue at the date of the form

2. "Gross distribution" is the total cash distribution plus the amount of imputation credits, per financial product.

3. "Gross taxable amount" is the gross distribution minus any excluded income.

4. "Total cash distribution" is the cash distribution excluding imputation credits, per financial product, before the deduction of RWT. This should include any excluded amounts, where applicable to listed PIEs.

5. The imputation credits plus the RWT amount is 33% of the gross taxable amount for the purposes of this form. If the distribution is fully imputed the imputation credits will be 28% of the gross taxable amount with remaining 5% being RWT. This does not constitute advice as to whether or not RWT needs to be withheld.

6. Calculated as (imputation credits/gross taxable amount) x 100. Fully imputed dividends will be 28% as a % rate applied.
