FY26 EBITDAF Guidance Range Update

Genesis Energy has updated its FY26 normalised EBITDAF guidance range from *\$430 million to \$460 million*, to an updated FY26 range of *\$455 million to \$485 million*.

This update is underpinned by strong Q1 FY26 operational performance largely due to favourable hydrology and wind outcomes that continue into Q2, coupled with upside from Unit 5's three month shut-down.

This guidance remains subject to final hydrological conditions, gas availability and pricing, plant reliability, and stable market conditions.

All other guidance remains as previously advised to the market.
