## What are the risks of investing?

Risk indicator for the Smart NZ Mid Cap ETF

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-profiler](https://sorted.org.nz/tools/investor-profiler).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for 5 years to 30 September 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement for the Smart Exchange Traded Funds – Australasia Series for more information about the risks associated with investing in this fund.

## How has the fund performed?

|                                                                                  | Average over past 5 years | Past year |
|----------------------------------------------------------------------------------|---------------------------|-----------|
| <b>Annual return</b><br>(after deductions for charges and tax)                   | 3.79%                     | 17.65%    |
| <b>Annual return</b><br>(after deductions for charges but before tax)            | 4.67%                     | 18.79%    |

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2025.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Smart NZ Mid Cap ETF are charged fund charges. In the year to 31 March 2025 these were:

|                                                    | % per annum of fund's net asset value |
|----------------------------------------------------|---------------------------------------|
| <b>Total fund charges</b>                          | 0.60%                                 |
| Which are made up of:                              |                                       |
| <b>Total management and administration charges</b> | 0.60%                                 |
| Including:                                         |                                       |
| Manager's basic fee                                | 0.58%                                 |
| Other management and administration charges        | 0.02% <sup>1</sup>                    |

Investors may also be charged individual action fees for specific actions or decisions (for example, withdrawing from or switching funds). See the Product Disclosure Statement for the Smart Exchange Traded Funds – Australasia Series for more information about those fees.

The fees set out above include GST where applicable.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Tara had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Tara received a return after fund charges were deducted but before tax of \$1,879 (that is 18.79% of Tara's initial \$10,000). This gives Tara a total return after tax of \$1,765 for the year.
