This fund update was first made publicly available on 12 February 2026.

What is the purpose of this update?

This document tells you how the Smart Global Property ETF has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Smart Global Property ETF is designed to track the return (before tax, fees and other expenses) of the FTSE EPRA Nareit Developed ex Aus Rental Net Tax Index (100% NZD Hedged).

The Index is comprised of a range of securities that include real estate investment trusts as well as companies that own real estate assets and

derive a significant portion of their revenue from rental income. The currency exposure is hedged to the New Zealand dollar.

Total value of the fund	\$3,555,156
The date the fund started	29 June 2023

What are the risks of investing?

Risk indicator for the Smart Global Property ETF¹

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement for the Smart Exchange Traded Funds – Global Series for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	2.69%
Annual return (after deductions for charges but before tax)	5.19%
Market index annual return (reflects no deduction for charges and tax)	5.83%

The market index annual return is based on the annual return of the FTSE EPRA Nareit Developed ex Aus Rental Net Tax Index (100% NZD Hedged). Additional information about the market index is available in the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2025.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Smart Global Property ETF are charged fund charges. In the year to 31 March 2025 these were:

	% per annum of fund's net asset value
Total fund charges	0.54%
Which are made up of:	
Total management and administration charges	0.54%
Including:	
Manager's basic fee	0.53%
Other management and administration charges	0.01% ²

Investors may also be charged individual action fees for specific actions or decisions (for example, withdrawing from or switching funds). See the Product Disclosure Statement for the Smart Exchange Traded Funds – Global Series for more information about those fees.

The fees set out above include GST where applicable.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Tara had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Tara received a return after fund charges were deducted but before tax of \$519 (that is 5.19% of Tara's initial \$10,000). This gives Tara a total return after tax of \$269 for the year.

Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 2 years and 6 months of market index returns.
- 2 These charges refer to the normal fund operating costs that are charged to the fund. For disclosure purposes, supervisor, audit and legal costs are not included in the manager's basic fee, but are included in the other management and administration charges. Some of these are fixed costs so the amount shown can range from 0% up to the total fund charges depending on the total value of the fund.
- 3 The fund is currently holding cash to offset a tax liability, for this reason the net cash holding displayed in this chart is lower than the amount displayed in the top 10 investments
- 4 The top 10 investments listed in the table exclude current assets and current liabilities, and as a result do not sum to 100%.
- 5 John Raby was appointed as a director with effect from 1 October 2025, replacing Guy Elliffe who ceased to be a director on 31 December 2025. Lisa Turnbull was appointed as Chief Executive Officer of Smart with effect from 16 October 2025
