(g) WIA's EBITDAF before subvention payment is presented to provide further information on its operating performance. The Board and management consider it is a useful non-GAAP financial measure for investors as it shows the contribution to earnings prior to non-cash items such as depreciation and amortisation, impairment losses, fair value adjustments, and before the cost of financing, subvention payments and taxation. EBITDAF before subvention payment is used by management in conjunction with other performance measures to monitor financial performance. It is calculated by adjusting net profit after taxation for the year for subvention payments and for items that are non-operating such as interest, taxation, depreciation, revaluations, and impairments. The adjustments in the reconciliation table below have been subject to audit and are set out in Note A1 to the audited financial statements of WIA.

| | 2026 \$000 | 2025 \$000 |
|---|----------------|----------------|
| Net profit/(loss) after taxation¹ | 15,695 | 25,842 |
| Subvention payment ² | 55,550 | 38,982 |
| Net financing expense ³ | 36,943 | 32,787 |
| Taxation (income)/expense | (3,464) | 1,867 |
| Depreciation | 34,855 | 29,905 |
| Investment property revaluation net (increase)/decrease | (6,252) | (1,604) |
| Loss/(Gain) on property write-offs | 101 | 2,400 |
| EBITDAF | 133,428 | 130,179 |

1. The net profit after taxation has been prepared in accordance with New Zealand generally accepted accounting practice and the New Zealand equivalents to International Financial Reporting Standards. The reported profit information has been taken from the audited financial statements of WIA.
2. WIA is a member of the Infratil tax group. WIA pays subvention payments to other members of the Infratil tax group.
3. Includes the fair value movement of the interest rate swaps put in place to hedge WIA's floating rate bonds.
4. Further explanation of the reconciling items is available in WIA's audited financial statements.
