1 Introduction

The Commonwealth Bank of Australia (CBA) is an Authorised Deposit-taking Institution (ADI) regulated by the Australian Prudential Regulation Authority (APRA) under the authority of the *Banking Act 1959* (Cth).

This document is prepared for CBA and its subsidiaries (the Group) in accordance with the Board approved policy and APRA's Prudential Standard APS 330 *Public Disclosures* (APS 330). Australian ADIs are required to comply with the "Disclosure requirements" Standard issued by the Basel Committee on Banking Supervision (BCBS), subject to certain modifications by APRA.

The document presents information on the Group's capital adequacy, Risk Weighted Assets (RWA) calculations, Group's leverage and liquidity ratios in accordance with prescribed regulatory methodologies.

For capital adequacy the Group reports information on credit risk (including securitisation), traded market risk, interest rate risk in the banking book (IRRBB) and operational risk.

The Group is required to report its assessment of capital adequacy on a Level 2 basis. Level 2 is defined as the Consolidated Banking Group excluding an insurance entity and certain entities through which securitisation of the Group's assets is conducted.

APS 330 reporting structure

The Group is predominantly accredited to use the Advanced Internal-Ratings Based (AIRB) approach for credit risk and the Standardised Measurement Approach (SMA) for operational risk. The Group is also required to assess its traded market risk and IRRBB requirements under Pillar 1 of the Basel capital framework.

This document is unaudited and has been prepared consistent with information that has been supplied to APRA.

The Group's Pillar 3 documents including disclosures of capital instruments are available on the Group's corporate website: commbank.com.au/regulatorydisclosures.

¹ Securitisation that meets APRA's operational requirements for regulatory capital relief under APS 120 *Securitisation* (APS 120).

2 Overview

Capital Position

As at 31 March 2026, the Group's Basel III Common Equity Tier 1 (CET1), Tier 1 and Total Capital ratios were 11.6%, 13.1% and 20.0%, respectively.

The Group's CET1 ratio increased by 7 basis points in the quarter after allowing for the impact of the 2026 interim dividend (-76 basis points). This increase was driven by capital generated from earnings (+51 basis points), partly offset by a net increase in total RWAs (-34 basis points) and other regulatory adjustments (-10 basis points).

Further details on the movements in RWA are provided on page 4.

The CET1 Capital ratio for Level 1 as at 31 March 2026 was 11.5% (31 December 2025: 12.2%).

	31 Mar 26	31 Dec 25
	%	%
Summary Group Capital Adequacy Ratios (Level 2)		
Common Equity Tier 1	11.6	12.3
Additional Tier 1	1.5	1.5
Tier 1	13.1	13.8
Tier 2	6.9	6.8
Total Capital	20.0	20.6

	31 Mar 26	31 Dec 25
	\$M	\$M
Group Regulatory Capital Position		
Common Equity Tier 1 Capital	59,806	61,922
Additional Tier 1 Capital	7,907	7,907
Tier 1 Capital	67,713	69,829
Tier 2 Capital	35,847	34,432
Total Capital	103,560	104,261
Risk Weighted Assets	517,538	505,310

Capital Initiatives

The following significant capital initiatives were undertaken during the quarter ended 31 March 2026:

Common Equity Tier 1 Capital

The Dividend Reinvestment Plan (DRP) in respect of the 2026 interim dividend was satisfied in full by the on-market purchase of shares. The participation rate for the DRP was 13.5%.

Tier 2 Capital

The Group issued AUD950 million, AUD600 million and AUD300 million Basel III compliant subordinated notes in March 2026.

Overview (continued)

Risk Weighted Assets

Total RWA increased \$12.2 billion or 2.4% on the prior quarter to \$517.5 billion, driven by higher IRRBB RWA and Credit risk RWA, partly offset by lower Traded Market Risk RWA.

Risk Weighted Assets	31 Mar 26 \$M	31 Dec 25 \$M
Credit Risk	414,612	409,119
of which: IRB (excluding counterparty credit risk)	380,081	375,267
of which: counterparty credit risk and other ¹	34,531	33,852
Traded Market Risk	7,519	9,971
Interest Rate Risk in the Banking Book	44,366	35,179
Operational Risk	51,041	51,041
Total Risk Weighted Assets	517,538	505,310

¹ Includes credit valuation adjustment, securitisation, standardised portfolios and settlement risk RWA.

Credit Risk RWA

Credit risk RWA increased \$5.5 billion or 1.3% on the prior quarter to \$414.6 billion. The key drivers include:

- Volume growth (increase of \$7.7 billion) across commercial portfolios, domestic residential mortgages and New Zealand portfolios; and
- Derivatives and other (increase of \$0.7 billion) mainly due to higher derivatives; partly offset by
- Foreign currency movements (decrease of \$2.1 billion);
- Credit quality improvement (decrease of \$0.5 billion); and
- Data & methodology (decrease of \$0.3 billion).

Traded Market Risk RWA

Traded Market Risk RWA decreased by \$2.5 billion or 25% on the prior quarter to \$7.5 billion, primarily driven by the securities financing portfolio.

Interest Rate Risk in the Banking Book (IRRBB) RWA

IRRBB RWA increased \$9.2 billion or 26% on the prior quarter to \$44.4 billion, largely driven by higher swap rates and deposit and equity hedge settings that are calibrated to provide stronger earnings stability through a rate cycle.

Operational Risk RWA

As required by APS 115, operational risk RWA as at 31 March 2026 and 31 December 2025 have been determined based on the annual average value of the relevant components of the Group's net income over the financial years ended 30 June 2025, 2024 and 2023.

Leverage Ratio

The Group's leverage ratio, defined as Tier 1 Capital as a percentage of total exposures, was 4.4% as at 31 March 2026. The decline in the leverage ratio in the quarter was primarily driven by the impact of the 2026 interim dividend and higher exposures, partly offset by capital generated from earnings.

The minimum leverage ratio requirement for IRB banks, such as CBA, is 3.5%.

Summary Group Leverage Ratio	31 Mar 26	31 Dec 25
Tier 1 Capital (\$M)	67,713	69,829
Total Exposures (\$M) ¹	1,522,249	1,497,194
Leverage Ratio (%)	4.4	4.7

¹ Total exposures is the sum of on balance sheet exposures, derivatives, securities financing transactions (SFTs), and off balance sheet exposures, net of any Tier 1 regulatory deductions, as outlined in APS 110 *Capital Adequacy* (APS 110).

Overview (continued)

Group Liquidity and Funding Ratios

	31 Mar 26	31 Dec 25
Group Liquidity and Funding Ratio	%	%
Liquidity Coverage Ratio	133	132
Net Stable Funding Ratio	116	117

Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) requires Australian ADIs to hold sufficient liquid assets to meet 30 day Net Cash Outflows (NCO) projected under an APRA prescribed severe liquidity stress scenario. Over the March 2026 quarter, excess liquid assets averaged \$48 billion and the average LCR increased from 132% to 133%. The increase in average LCR was due to a decrease in NCO, partly offset by lower HQLA. The decrease in average NCOs is mainly due to a decrease in wholesale funding maturities and increased cash inflows within the 30 day window.

Net Stable Funding Ratio

The Net Stable Funding Ratio (NSFR) is the ratio of the amount of Available Stable Funding (ASF) to the amount of Required Stable Funding (RSF) over a one year horizon. Factors prescribed by APRA are used to determine the stable funding requirement of assets and the stability of alternative sources of funding. The Group's NSFR was 116% at 31 March 2026, down 1% from the prior quarter driven by higher RSF from lending growth.

3 Risk Weighted Assets

RWA are calculated using the AIRB approach for the majority of the Group's credit risk exposures and using the Foundation or Standardised approach as required under the Australian prudential standards. For CBA's New Zealand Subsidiary, ASB, RWA are calculated using the RBNZ prudential rules subject to certain APRA-prescribed adjustments. The Group must use the External Ratings-based Approach where a securitisation exposure is externally rated by an External Credit Assessment Institution (ECAI) or for which an inferred rating is available. Where the Group cannot use the External Ratings-based Approach, the Group must use the Supervisory Formula Approach.

OV1: Overview of RWA

The following table provides an overview of total RWA by risk type and approach with further details on movements in RWA being provided on page 4.

	RWA			Minimum capital requirements ¹
	31 Mar 26 \$M	31 Dec 25 \$M	30 Sep 25 \$M	31 Mar 26 \$M

⁴ Includes immaterial contributions from other standardised asset classes, including domestic public sector entities, commercial property, land acquisition, development and construction, and bank.

Risk Weighted Assets (continued)

CMS1: Comparison of modelled and standardised RWA at risk level

The Group is predominantly accredited to use its own internal models to determine the capital requirements for Credit Risk, Market Risk and IRRBB. APRA's ADI capital framework has been calibrated such that the capital requirements using the internal model methods tend to be lower than standardised capital requirements. This calibration has the policy objectives of encouraging investment by banks in advanced modelling capabilities and associated technology, data and specialist skills and enabling banks to more accurately allocate capital for risk.

The Group's total RWA is above the 72.5% minimum set by the BCBS and APRA as a safeguard to ensure that the capital benefit for advanced banks is not excessive and does not unfairly disadvantage standardised banks.

The following table provides details of the comparison of modelled and standardised RWA by risk type. Details on the key drivers of the movements in RWA are provided on page 4.

31 March 2026				
	RWA for modelled approaches that banks have supervisory approval to use	RWA for portfolios where standardised approaches are used	Total Actual RWA	RWA calculated using full standardised approach (ie used in the base of the output floor)
	\$M	\$M	\$M	\$M
1 Credit risk (excluding counterparty credit risk)	380,081	19,274	399,355	605,606
2 Counterparty credit risk	7,248	409	7,657	17,228
3 Credit valuation adjustment	n/a	3,461	3,461	3,461
4 Securitisation exposures in the banking book	–	4,137	4,137	4,137
5 Market risk	5,874	1,645	7,519	7,519
Interest rate risk in banking book	44,366	–	44,366	–
6 Operational risk	n/a	51,041	51,041	51,041
7 Residual RWA	n/a	2	2	2
8 Total	437,569	79,969	517,538	688,994

31 December 2025				
	RWA for modelled approaches that banks have supervisory approval to use	RWA for portfolios where standardised approaches are used	Total Actual RWA	RWA calculated using full standardised approach (ie used in the base of the output floor)
	\$M	\$M	\$M	\$M
1 Credit risk (excluding counterparty credit risk)	375,267	19,138	394,405	597,994
2 Counterparty credit risk	6,939	345	7,284	15,655
3 Credit valuation adjustment	n/a	3,327	3,327	3,327
4 Securitisation exposures in the banking book	–	4,096	4,096	4,096
5 Market risk	8,574	1,397	9,971	9,971
Interest rate risk in banking book	35,179	–	35,179	–
6 Operational risk	n/a	51,041	51,041	51,041
7 Residual RWA	n/a	7	7	7
8 Total	425,959	79,351	505,310	682,091

The difference between internally modelled RWA and the associated full standardised approach RWA for credit risk is mainly driven by residential mortgage and corporate (including large and SME corporate) asset classes.

CR8: RWA flow statements of credit risk exposures under IRB

The following table summarises the movements of credit RWA under the IRB approach. The table excludes derivative and SFTs exposures subject to counterparty credit risk requirements, equity and securitisation exposures. Details on the key drivers of the movements in credit RWA are provided on page 4.

	RWA amounts	
	Quarter ended	
	31 Mar 26	31 Dec 25
	\$M	\$M
1 RWA as at end of previous reporting period	375,267	365,936

Leverage Ratio

LR2: Leverage ratio common disclosure template

The table below shows the leverage ratio calculation and includes additional breakdowns of the leverage ratio exposure measure. Refer to page 4 for the details on the movements in the leverage ratio.

	31 Mar 26	31 Dec 25
	\$M	\$M
On-balance sheet exposures		
1 On-balance sheet exposures (excluding derivatives and securities financing transactions (SFTs), but including collateral)	1,308,583	1,292,890
2 Gross-up for derivatives collateral provided where deducted from balance sheet assets pursuant to the operative accounting framework	-	-
3 (Deductions of receivable assets for cash variation margin provided in derivatives transactions)	(3,417)	(5,141)
4 (Adjustment for securities received under securities financing transactions that are recognised as an asset)	-	-
5 (Specific and general provisions associated with on-balance sheet exposures that are deducted from Tier 1 capital)	-	-
6 (Asset amounts deducted in determining Tier 1 capital and regulatory adjustments)	(18,921)	(18,345)
7 Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of rows 1 to 6)	1,286,245	1,269,404
Derivative exposures		
8 Replacement cost associated with all derivatives transactions (where applicable net of eligible cash variation margin, with bilateral netting and/or the specific treatment for client cleared derivatives)	11,631	6,696
9 Add-on amounts for potential future exposure associated with all derivatives transactions	22,096	20,949
10 (Exempted central counterparty (CCP) leg of client-cleared trade exposures)	-	-
11 Adjusted effective notional amount of written credit derivatives	1,144	808
12 (Adjusted effective notional offsets and add-on deductions for written credit derivatives)	(1,080)	(785)
13 Total derivative exposures (sum of rows 8 to 12)	33,791	27,668
Securities financing transaction exposures		
14 Gross SFT assets (with no recognition of netting), after adjustment for sale accounting transactions	108,963	114,453
15 (Netted amounts of cash payables and cash receivables of gross SFT assets)	(33,569)	(39,203)
16 Counterparty credit risk exposure for SFT assets	3,582	3,450
17 Agent transaction exposures	-	-
18 Total securities financing transaction exposures (sum of rows 14 to 17)	78,976	78,700
Other off-balance sheet exposures		
19 Off-balance sheet exposure at gross notional amount	239,058	237,112
20 (Adjustments for conversion to credit equivalent amounts)	(115,821)	(115,690)
21 (Specific and general provisions associated with off-balance sheet exposures deducted in determining Tier 1 capital)	-	-
22 Off-balance sheet items (sum of rows 19 to 21)	123,237	121,422
Capital and total exposures		
23 Tier 1 capital	67,713	69,829
24 Total exposures (sum of rows 7, 13, 18 and 22)	1,522,249	1,497,194
Leverage ratio		
25 Leverage ratio (%) (including the impact of any applicable temporary exemption of central bank reserves)	4.4	4.7
25a Leverage ratio (%) (excluding the impact of any applicable temporary exemption of central bank reserves)	4.4	4.7
26 National minimum leverage ratio requirement (%)	3.5	3.5
Disclosure of mean values		
28 Mean value of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables	75,394	75,250
30 Total exposures (including the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	1,522,249	1,497,194
30a Total exposures (excluding the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	1,522,249	1,497,194
31 Basel III leverage ratio (%) (including the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	4.4	4.7
31a Basel III leverage ratio (%) (excluding the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	4.4	4.7

6 Liquidity Risk

LIQ1: Liquidity Coverage Ratio

The Group calculates its LCR position on a daily basis, ensuring a buffer is maintained over the minimum regulatory requirement of 100% and the Board's risk appetite. The Group maintained an average LCR of 133% in the March 2026 quarter.

The Group's mix of liquid assets consists of HQLA, such as cash, deposits with central banks, Australian semi-government and Commonwealth government securities. Liquid assets also include securities classified as liquid assets by the RBNZ. Liquid assets are distributed across the Group to support regulatory and internal requirements and are consistent with the distribution of liquidity needs by currency. Average liquid assets decreased \$6.4 billion or 3.2% over the quarter mainly driven by a core balance sheet funding gap.

NCO are modelled under an APRA prescribed 30 day severe liquidity stress scenario. The Group manages modelled NCO by maintaining a large base of low LCR outflow customer deposits and actively managing its wholesale funding maturity profile as part of its overall liquidity management strategy. Average NCO decreased \$6.0 billion or 4.0% over the quarter due to a decrease in wholesale funding maturities and increased cash inflows within the 30-day window.

20 NSFR ratio (%)	116	117	116	115	116

¹ Represents CET1 capital in excess of the regulatory minimum requirement of 4.5%.

Management attestation

Commonwealth Bank of Australia attests that:

Prudential disclosures for the Commonwealth Bank of Australia and its subsidiaries (the Group) are prepared in accordance with the “Disclosure requirements” Standard made by the Basel Committee on Banking Supervision, subject to modifications specified in APRA Prudential Standard APS 330 *Public Disclosure* (APS 330). In line with APS 330, the Group maintains a Board-approved disclosure policy that sets out the Group’s approach to determining the content of its prudential disclosures, and the internal controls and procedures for disclosures, including review and verification processes. The Group’s Pillar 3 Capital Adequacy and Risk Disclosures as at 31 March 2026 have been prepared in accordance with the Group’s disclosure policy.

Alan Docherty

Group Chief Financial Officer

13 May 2026

Term	Definition
Additional Tier 1 Capital (AT1)	Additional Tier 1 Capital is a concept defined by APRA and consists of high quality capital that essentially provides a permanent and unrestricted commitment of funds, is freely available to absorb losses, ranks behind the claims of depositors and other senior creditors in the event of a wind-up, and provides for fully discretionary capital distributions.
Advanced Internal Ratings-based (AIRB) Approach	This approach is used to measure credit risk in accordance with the Group's Basel III accreditation. This allows the Group to use internal estimates of PD and LGD (excluding senior unsecured and subordinated corporate exposures), with supervisory estimates to be used for EAD for the purposes of calculating regulatory capital.
ASB	ASB Bank Limited – a subsidiary of the Commonwealth Bank of Australia that is regulated by the RBNZ.
Australian Accounting Standards	The Australian Accounting Standards as issued by the Australian Accounting Standards Board (AASB).
Australian Prudential Regulation Authority (APRA)	The Australian Prudential Regulation Authority is an independent statutory authority that supervises institutions across banking, insurance and superannuation, and is accountable to the Australian parliament. The regulator of banks, insurance companies and superannuation funds, credit unions, building societies and friendly societies in Australia.
Authorised Deposit-taking Institution (ADI)	ADIs are corporations that are authorised under the <i>Banking Act 1959</i> (Cth) to carry on banking business in Australia.
Banking Book	The banking book is a term for assets on a bank's Balance Sheet that are expected to be held to maturity, usually consisting of customer loans to, and deposits from retail and corporate customers. The banking book can also include those derivatives that are used to hedge exposures arising from the banking book activity, including interest rate risk.
Basel III	Refers to the Basel Committee on Banking Supervision's framework for more resilient banks and banking systems issued in December 2010 (revised in June 2011), Capital requirements for bank exposures to central counterparties (July 2012), and the subsequent Basel III reforms finalised in December 2017.
Capital Floor	The capital floor is defined as the higher of total RWA as determined under the IRB approach, and 72.5% of total RWA as calculated under the standardised approach.
CBA	Commonwealth Bank of Australia – the head entity of the Group.
Central Counterparty (CCP)	A clearing house that interposes itself between counterparties to contracts traded in one or more financial markets, thereby ensuring the future performance of open contracts.
Collective Provision	All loans and receivables that do not have an individually assessed provision are assessed collectively for impairment. The Collective Provision is maintained to reduce the carrying value of the portfolio of loans to their estimated recoverable amounts. These provisions are reported in the Group's Financial Statements in accordance with Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>).
Commercial Property	Basel asset class – a property exposure that is not a residential property or a land acquisition, development and construction exposure.
Common Equity Tier 1 (CET1) Capital	The highest quality of capital available to the Group reflecting the permanent and unrestricted commitment of funds that are freely available to absorb losses. It comprises ordinary share capital, retained earnings and reserves, less prescribed deductions.
Corporate	This includes commercial credit risk where annual revenues are greater than or equal to \$75 million but less than \$750 million.
Corporate - Large	Basel asset class – applies to commercial credit risk where annual revenues are more than \$750 million.
Credit Valuation Adjustment (CVA) Risk	The risk of mark-to-market losses related to deterioration in the credit quality of a derivative counterparty.
Domestic Public Sector Entity	Basel asset class – exposures that do not meet the definition of Sovereign exposures, but have a level of control or ownership by any level of the Australian Government or the RBA, including those which do not have specific revenue-raising powers.
Exposure at Default (EAD)	The extent to which the Group may be exposed if a borrower defaults.

Glossary (continued)

Term	Definition
Extended Licenced Entity (ELE)	An Extended Licensed Entity comprises an ADI and any of its subsidiaries specified in an approval granted by APRA under Prudential Standard APS 222 <i>Associations with Related Entities</i> .
External Credit Assessment Institution (ECAI)	For example: Moody's Investor Services, S&P Global Ratings or Fitch Ratings.
Financial Institution	Basel asset class – primarily includes exposures which relate to: banking, the management of financial assets, lending, factoring, leasing, provision of credit enhancements, securitisation, investments, financial custody, central counterparty services, and proprietary trading.
Foundation Internal Ratings-based (FIRB) Approach	This approach is used to measure credit risk in accordance with the Group's Basel III accreditation that allows the Group to use internal estimates of PD and rely on supervisory estimates for LGD and EAD for the purposes of calculating regulatory capital.
General Provisions	Collective Provisions classified as Stage 1 and Stage 2 in accordance with Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>). All Stage 2 provisions are held on a purely forward-looking basis for future losses presently unidentified; hence all Stage 2 provisions (together with Stage 1) are classified as General Provisions.
Group	Commonwealth Bank of Australia and its subsidiaries.
High-Quality Liquid Assets (HQLA)	Assets are considered to be high-quality liquid assets if they can be easily and immediately converted into cash at little or no loss of value.
Individual provisions	Provisions made against individual facilities where there is objective evidence of impairment and full recovery of principal and interest is considered doubtful. These provisions are as reported in the Group's Financial Statements in accordance with the Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>). Also known as individually assessed provisions or IAP.
Interest Rate Risk in the Banking Book (IRRBB)	The risk that the Group's earnings and economic value are adversely affected by changes in interest rates. The Group's banking book activities include lending, investing in liquid assets, deposit taking, issuing wholesale funding and managing capital. These activities generate interest income and expense and expose the Group to interest rate risk. IRRBB arises from mismatches in the interest rate repricing of assets and liabilities, which can create volatility in both earnings and the economic value of the banking book.
Level 1	The Parent Bank (Commonwealth Bank of Australia), offshore branches (the Bank) and APRA approved Extended Licensed Entities.
Level 2	The level at which the Group reports its capital adequacy to APRA, being the Consolidated Banking Group comprising the ADI and all of its subsidiary entities other than the insurance business and certain entities through which securitisation of Group assets is conducted. This is the basis on which this report has been produced.
Level 3	The conglomerate group including the Group's insurance entity and qualifying securitisation entities.
Leverage Ratio	Tier 1 Capital divided by total exposures, expressed as a percentage.
Liquidity Coverage Ratio (LCR)	The LCR is a quantitative liquidity measure that is part of the Basel III reforms. It was implemented by APRA in Australia on 1 January 2015. It requires Australian ADIs to hold sufficient liquid assets to meet 30-day net cash outflows projected under an APRA prescribed stress scenario.
Loss Given Default (LGD)	An estimate of the expected severity of loss for a credit exposure following a default event. LGD represents the fraction of EAD that is not expected to be recovered following a default.
Net Cash Outflows (NCO)	Net cash outflows in the LCR are calculated by applying prescribed run-off factors on liabilities and various off Balance Sheet exposures that can generate a cash outflow in the next 30 days.
Net Stable Funding Ratio (NSFR)	The NSFR more closely aligns the behaviour term of assets and liabilities. It is the ratio of the amount of available stable funding (ASF) to the amount of required stable funding (RSF). ASF is the portion of an ADI's capital and liabilities expected to be a reliable source of funds over a one-year time horizon. RSF is a function of the liquidity characteristics and residual maturities of an ADI's assets and off Balance Sheet activities.

Glossary (continued)

Term	Definition
Non-performing	<p>Credit exposures are classified as non-performing when they are in default. Default is considered to have occurred with regards to a particular borrower or counterparty when either:</p> <ul style="list-style-type: none"> they are 90 calendar days or more past due on a credit obligation to the Group; and/or the Group considers they are unlikely to pay their credit obligations to the Group in full, without recourse by the Group to actions such as realising available security. <p>A credit exposure that has been classified as non-performing may be reclassified to performing when all of the following criteria are met:</p> <ul style="list-style-type: none"> the borrower or counterparty does not have any credit exposure 90 days or more past-due; the borrower's or counterparty's situation has improved so that full repayment of the credit exposure is likely; repayments have been made when due over a continuous repayment period of at least 90 calendar days, or at least six months for restructured exposures; and no individually assessed provision is held.
Operational Risk under the Standardised Measurement Approach	The methodology used to measure operational risk, utilising an APRA prescribed formulaic approach which is largely dependent on profit or loss from ordinary banking activities.
Other Assets	Basel asset class – primarily includes Cash Items, Investments in Related Entities, Fixed Assets, Lease Assets and Margin Lending.
Other Retail	Basel asset class – primarily includes retail credit exposures not otherwise classed as a residential mortgage, SME retail or a qualifying revolving retail asset.
Past Due	Facilities are past due when a contracted amount, including principal or interest, has not been met when due, or when it is otherwise outside contracted arrangements.
Probability of Default (PD)	The PD reflects a borrower's ability to generate sufficient cash flows in the future to meet the terms of all of its credit obligations to the Group.
Prudential Capital Requirement (PCR)	The regulatory minimum CET1, Tier 1 and Total Capital ratios that the Group is required to maintain at all times.
Qualifying Revolving Retail (QRR)	Basel asset class – represents revolving exposures less than \$0.1 million to individuals, unsecured and unconditionally cancellable by the Group. Only Australian retail credit cards qualify for this asset class.
RBA	Reserve Bank of Australia.
RBNZ	Reserve Bank of New Zealand.
RBNZ regulated entities	All references to RBNZ regulated entities refer to RBNZ regulated subsidiaries and include ASB exposures for which RWA are calculated using the RBNZ's prudential rules subject to certain APRA-prescribed adjustments.
Residential Mortgage	Basel asset class – retail exposures secured by residential mortgage property.
Risk Weighted Assets (RWA)	The value of the Group's on and off Balance Sheet assets are adjusted by risk weights calculated according to various APRA prudential standards.
Scaling Factor	In order to broadly maintain the aggregate level of capital in the global financial system post implementation of Basel II, the Basel Committee on Banking Supervision applies a scaling factor to the RWA amounts for credit risk under the IRB Retail, AIRB and FIRB approaches of 1.10. This is also applied to advanced exposures within RBNZ regulated entities.
Securities Financing Transaction (SFT)	Means a transaction such as a repurchase agreement, reverse repurchase agreement or a securities lending and borrowing transaction where the value of the transaction depends on the market valuation of securities and the transaction is typically subject to margin agreements.
Securitisation	Basel asset class – Group originated securitised exposures and the provision of facilities to customers in relation to securitisation activities.
SME corporate	Basel asset class – Small and Medium Enterprise (SME) commercial credit risk where annual revenues are less than \$75 million.
SME retail	Basel asset class – Small and Medium Enterprise (SME) commercial credit risk where annual revenues are less than \$75 million and exposures are less than \$1.5 million.

Glossary (continued)

Term	Definition
Sovereign	Basel asset class – primarily claims on Australian and foreign governments, central banks (including the RBA), international banking agencies and regional development banks.
Specialised Lending	Basel asset classes subject to the supervisory slotting approach which include: object finance, project finance and commodity finance.
Specific Provisions	All provisions, both collectively and individually assessed, classified as Stage 3 in accordance with Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>).
Stage 1	On origination, an impairment provision equivalent to 12 months expected credit losses (ECL) is recognised, reflecting the credit losses expected to arise from defaults occurring over the next 12 months.
Stage 2	Financial assets that have experienced a significant increase in credit risk (SICR) since origination are transferred to Stage 2 and an impairment provision equivalent to lifetime ECL is recognised. Lifetime ECL is the credit losses expected to arise from defaults occurring over the remaining life of financial assets. If credit quality improves in a subsequent period such that the increase in credit risk since origination is no longer considered significant the exposure is reclassified to Stage 1 and the impairment provision reverts to 12 months ECL.
Stage 3	Non-performing (defaulted) financial assets are transferred to Stage 3 and an impairment provision equivalent to lifetime ECL is recognised.
Standardised Approach	An alternate approach to the assessment of credit, operational and traded market risk whereby an ADI uses external ratings agencies to assist in assessing credit risk and/or the application of specific values provided by regulators to determine RWA.
Stressed Value-at-Risk (SVaR)	Stressed Value-at-Risk uses the same methodology as VaR except that the historical data used is taken from a one-year observation period of significant market volatility as seen during the Global Financial Crisis.
Tier 1 Capital	Comprises CET1 and Additional Tier 1 Capital.
Tier 2 Capital	Capital items that fall short of the necessary conditions to qualify as Tier 1 Capital.
Total Capital	Comprises CET1, Additional Tier 1 Capital and Tier 2 Capital.
Total Exposures (as used in the leverage ratio)	The sum of on Balance Sheet items, derivatives, securities financing transactions (SFTs), and off Balance Sheet items, net of any Tier 1 regulatory deductions that are already included in these items, as outlined in APS 110 <i>Capital Adequacy</i> (APS 110) Attachment D.
Trading Book	Exposures, including derivative products and other off Balance Sheet instruments that are held either with a trading intent or to hedge other elements of the trading book.
Value-at-Risk (VaR)	Value-at-Risk is a measure of potential loss using historically observed market volatility and correlation between different markets.

Important information

The material in this report is current as at the date of this report, 13 May 2026.

This report may contain certain forward-looking statements with respect to the financial condition, capital adequacy, operations and business of the Group. Forward-looking statements can generally be identified by the use of words such as “may”, “will”, “would”, “could”, “expect”, “aim”, “estimate” or other similar words, and include statements regarding the Group’s intent, belief or current expectations with respect to the Group’s business and operations, market conditions, results of operations and financial condition, capital adequacy and risk management. Such forward-looking statements speak only as at the date of this report and undue reliance should not be placed upon such statements. Past performance is not a reliable indicator of future performance. Although the Group currently believes the forward-looking statements have a reasonable basis, they are not certain and involve known and unknown risks and assumptions, many of which are beyond the control of the Group, which may cause actual results, conditions or circumstances to differ materially from those expressed or implied in such statements.

Actual results may vary significantly from those anticipated or suggested by forward-looking statements, due to a range of factors, including but not limited to those outlined in the sections titled ‘Our operating context’ and ‘Managing our risks’ in our 2025 Annual Report, available at commbank.com.au/annualreport. Readers are cautioned not to place undue reliance on forward-looking statements, particularly in light of: current economic conditions, the increasingly complex geopolitical setting, competitive intensity and the evolving technological landscape.

To the maximum extent permitted by law, responsibility for the accuracy or completeness of any forward-looking statements, whether as a result of new information, future events or results or otherwise, is disclaimed. The Group is under no obligation to update any of the forward-looking statements contained within this report, subject to applicable disclosure requirements.
