- **In line with the ASX release from 16 October referring to a now weekly delivery schedule, Manuka expects next delivery of precious metals bearing filter cake, to ABC Refinery in Sydney, will occur on 23 October.**

Manuka Resources Limited (**Manuka or the Company**) (**ASX/NZX: MKR**) is pleased to report that refining results have confirmed 267oz of gold and 453oz of silver from precious metals-bearing material delivered to ABC Refinery in Sydney on 16 October 2026, generating proceeds of A\$1,644,812.

As advised previously, gold production will remain the immediate operational focus at Wonawinta ahead of the next phase of the Company's production strategy. The Company plans to report on October operating profitability from gold in early November and provide quarterly production updates thereafter.

With Mt Boppy gold-bearing screened waste dump material available to support ongoing operations, Manuka retains the flexibility to optimise the balance of gold and silver processing following commissioning of the new silver circuit. This will enable the Company to adjust its production mix having regard to relative precious metals prices, operating performance and expected returns.

Following commissioning of the new crushing and silver deslime circuits, the Company expects Wonawinta to transition to **combined gold and silver processing early 2027**.

The introduction of silver alongside existing gold production represents the next major step in Manuka's strategy to establish Wonawinta as a long-life, multi-source precious metals production hub in the Cobar Basin.
