B Corp™ certification achieved

BLIS Technologies Limited (BLIS) is now a Certified B Corporation™ (B Corp) marking a significant milestone in BLIS' commitment to responsible and sustainable business practices. B Corp Certification is an internationally recognised designation that a business is meeting high standards of verified performance, accountability, and transparency on a broad number of Environment, Social and Governance (ESG) factors.

This achievement reflects BLIS' determination to leave the world in a better place. Certified B Corps are leaders in the global movement for an inclusive, equitable, and regenerative economy. BLIS joins a growing global community of like-minded companies that strive to balance profit with purpose, seeking to use business as a force for good.

B Corps are for-profit organisations whose performance is measured across five impact areas: governance, workers, customers, community and the environment. Companies must document their positive impact to apply using the B Impact Assessment tool, and undergo an independent verification process every three years to achieve and maintain certification. As part of this process, the BLIS constitution was amended at the 2025 Annual Shareholders meeting to reflect its commitment to consider all stakeholders in its decision making.

BLIS CEO, Scott Johnson, said "I am very proud to announce that BLIS is now B Corp certified and want to thank all the team for their hard work to achieve this prestigious recognition. This is a great achievement for our business and our people and reaffirms the BLIS core purpose of delivering innovation to consumers to improve their health and wellbeing, while committing to high social and environmental performance."
